ABOUT 1838

At the heart of 1838 is a celebration of design and craftsmanship. A luxury brand manufacturing all wallpapers at our factory in Lancashire, England. The name evokes the deep roots of wallpaper innovation, for 1838 was the year the first wallpaper machine was pioneered, just a few miles away from the factory.

A family owned business, 1838 Wallcoverings is led by brother and sister team James and Abigail Watson, whose family has over four generations of wallpaper printing experience.

All wallpapers are manufactured using water based, non-toxic inks, which are environmentally safe and printed on responsibly sourced, recyclable, non woven substrates.

THE PAVILION COLLECTION

The theme of the Pavilion Collection is modern archive; exploring heritage looks with a modern twist. Pavilion pays homage to the styles of the past and reimagines them to suit the interiors of today. Taking inspiration from the elegant style of British stately homes and gardens, old world elements are combined with adventurous colour and innovative techniques. The sumptuously beautiful designs showcase our contemporary craftsmanship, including richly textured new special effects and stunning murals.

An eclectic capsule collection of modern archive designs.
