WILLOW

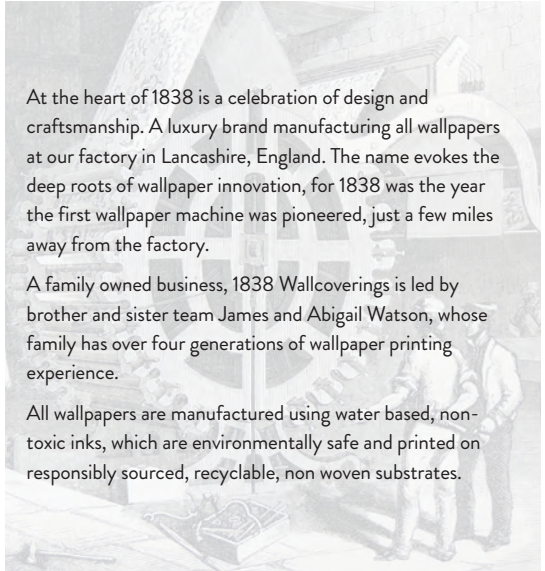

## ABOUT 1838

At the heart of 1838 is a celebration of design and craftsmanship. A luxury brand manufacturing all wallpapers at our factory in Lancashire, England. The name evokes the deep roots of wallpaper innovation, for 1838 was the year the first wallpaper machine was pioneered, just a few miles away from the factory.

A family owned business, 1838 Wallcoverings is led by brother and sister team James and Abigail Watson, whose family has over four generations of wallpaper printing experience.

All wallpapers are manufactured using water based, non-toxic inks, which are environmentally safe and printed on responsibly sourced, recyclable, non woven substrates.

## THE WILLOW COLLECTION

In this hectic, always-on world many are seeking a calm space to relax, recuperate and revive. Patterns that recall nature promote a feeling of well-being and calm to create a sanctuary at home.

The Willow Collection encompasses aquatic inky florals, handcrafted basket weave textures, watery ripples and bird life entwined in leafy hedgerows.

It includes innovative digitally printed patterns from nature, some embellished with velvety flock or shimmering beads and two luxurious grasscloth wallcoverings.

Warming neutral shades echo nature and calming caramel tones bring a sense of tranquillity. Radiant organic shades of misted chamomile, tints of lavender and taupe are complemented with reflective shimmers, whilst deep teal, dusky blues and bracken offer mysterious depths.

Nature is far too beautiful to be kept outside.
