

## Fabric Cleaning Instructions

### alta™ applications

residential, guest room seating, food & beverage seating, healthcare, workplace, outdoor, nightclub, spa, headboard, drapery, pillow & accessories, top of bed, mattress

alta technology dramatically enhances the cleanability of a wide array of fabrics and reduces the need for harsh chemical cleaners. Simply following the instructions below.\*

#### 1. Clean liquid spills quickly with a dry, clean, absorbent cloth. For liquids still beading up:

- Gently blot (don't rub) a spill immediately with a dry, clean, absorbent cloth
- No rinsing needed!

#### 2. If any residual spot remains, rinse freely with warm water:

- Remove any excess soil or debris from the surface. Flush soiled area liberally with warm water then blot with a dry, clean, absorbent cloth.
- Change towel surface frequently until spot is gone. Try to avoid brushing which can spread the stain; keep repeating the process until the spot has been removed.
- Repeat again by rinsing with warm water and then blot clean, dry cloth if needed.
- It is ok to use a water extraction machine if desired (follow directions on machine).

#### 3. For difficult or stubborn stains:

- Follow steps 1 & 2 first...then using 2-3 drops of a mild dishwasher detergent with a cup of water - apply to the soiled area.
- Gently work the solution into the area, wait a minute and blot the spot with a clean, dry, absorbent cloth. Repeat until spot has been completely removed.
- After cleaning, be sure to rinse thoroughly with warm water and blot to remove any soap residue.
- Any remaining soap not rinsed away in the fabric can cause a reoccurring stain.
- Still have a problem? Call the experts at Applied Textiles for help...

If we can help you with any textile cleaning challenge – take a picture and send it to us – Applied can help!

#### Laundering instructions:

- Do not wash in water temperature above 120 degrees
- Do not use harsh detergents or solvents
- Do not use fabric softeners
- Do not use cleaners containing oxidizers
- Let air dry or tumble dry at low temperature setting
- Ironing may be used if necessary

\*These instructions should not replace the cleaning instructions accompanying the fabric. Always follow your fabric's recommended care instructions and use in conjunction with the above noted instructions.
