MAXWELL FABRICS

Performance-Driven

WHY CHOOSE MAXWELL FABRICS?

The guiding principle of our development process is that good design is not simply about visually-pleasing aesthetics; it must be accessible, functional and perform in real life. Performance means so much more than simply high double rubs. Maxwell Fabrics works with innovative suppliers and technologies to ensure that our textiles and wallcoverings bring residential hand and styling to the realm of performance-driven commercial design.

ABOVE AND BEYOND

When we set out to design our Performance Wovens series, adding industry-leading soil and stain repellent technology alone was not enough. We designed constructions that pass all Association for Contract Textile standards for upholstery in a public space, from abrasion and pilling to seam slippage and FR. Maxwell Fabrics works with the biggest names in indoor/outdoor, Sunbrella and Bella Dura, to create exclusive designs and textures that bring the indoors out with the confidence of high colorfastness to light and mildew resistance. Performance is the keyword in our Easy Rider line of faux leathers. From highly durable PVCs to polyurethanes with remarkable hydrolysis performance and stain resistance, the focus is on goods that are worry-free and suitable for residential and commercial applications.

CURRENT BOOKLIST
